

ASHISH PATEL

COMPUTER SCIENCE& ENGG.(B.Tech ,4Y)

With specialization artificial intelligence and machine learning

EDUCATION

Year	Degree/Exam	Institute	CGPA/Marks
2026	B.TECH CSE AI ML	K R Mangalam University	7.4 / 10

INTERNSHIPS

Data Annotation Intern – IIT Roorkee, Uttarakhand	15 Oct 2025 – 30 Nov 2025
• Worked on river surveillance video data to detect floating debris. - Performed precise frame-level annotation and object tracking using CVAT. - Supported training and retraining of Computer Vision models for better accuracy	
Research Intern – IIT Mandi, Himachal Pradesh	25July'2024 – 25Aug'2024
• Developed Indian language Text-to-Speech (TTS) systems using PyTorch and TensorFlow.	
• - Optimized model inference time and improved speech clarity.	
• - Worked with large-scale audio-text datasets and participated in technical workshops.	

MAJOR PROJECTS

Floating Debris Detection System (Computer Vision)
• Implemented object detection and tracking pipeline on river footage.
• Supported dataset creation and model retraining for debris classification.
Object Segmentation & Detection Model
• Built deep learning-based segmentation and detection system.
• Improved performance using data augmentation and fine-tuning.
Custom Retrained Vision Model
• Retrained CNN models for domain-specific object recognition.
• Achieved improved accuracy through transfer learning.
VedaWell System
• RAG-based AI healthcare assistant integrating Ayurveda knowledge.
Style TTS 2
• Multilingual speech synthesis system for Indian languages.
Fashion Assistant
• AI-driven fashion recommendation system using CLIP + Sentence Transformers.

Awards & Achievements

Competitive Coding – 100 DSA problem (leetcode& HackerRank)|

Technical Skill & Course information

Academic Courses: Programming and Data Structures Differential Calculus Data Analytics Algorithms and Data Structures Deep Learning Foundations and Applications Probability and Statistics Integral Calculus Transform Calculus MOOCs: Hands-on Machine Learning Machine Learning Deep Learning specialisation Probability and Applied Statistics AlgoZenith (Algorithms) Natural language processing & Large language model, Retrieval Augmented Generation(RAG)
Programming Languages&Tool: Python Java Libraries and Tools: Scikit-Learn Pandas Numpy PyTorch TensorFlow Keras NLTK Spacy OpenCv Matplotlib SeaBorn PDFMiner PyPanDoc GitHub Tableau SSH GIT SQL MongoDB CVAT jupyter notebook Vs code Git
Core Skill : computer version -: object detection object Segmentation Object Track Model Retraining& finetuning Transfer learning image & video Processing Open CV ,CVAT

Certifications & Soft & Language

• Certificates: IBM: Data Analysis, Machine Learning, Deep Learning, Design Thinking Samatrix: Data Science, R Programming, AI/DS Foundations Microsoft Learner: Image & Text Analysis Udemy: RAG & LLM Internship Certificate: IIT Mandi
• Soft skill : Quick Learner Team Player Consistent Problem Solver Adaptable
• Languages : English,Hindi
